

## FILI PER SALDATURA

**SUBJECT:** REACH Regulation (CE) n. 1907/2006

Dear Customer,

since 1 June 2007 entered into force the REACH Regulation (CE) n. 1907/2006 of the European Parliament and Council.

In accordance with the provisions of REACH, who manufactures or imports from outside the EU a substance on its own or contained in a preparation, in quantities equal to or greater than one tonne per year, will be obliged to register with the European Chemical Agency with different methods and timing depending on the quantity produced or imported and the hazard of the substance.

**In reference to the provisions of the REACH Regulation, we communicate you that we have adapted to this standard and all our products are in accordance with REACH Regulation.**

Our company does not manufacture or import chemicals so it is not required to complete that registration.

However, as users of chemicals, we have interest and need to receive information from our suppliers. We therefore prepared an inventory of all substances purchased from us and we communicate to you that these substances have already been registered by our suppliers (or their pre-supplier).

**We inform you that our products do not contain chemicals present in the "Candidate List of SVHC" published in the ECHA website (last updated on 19/01/2021).**

If we discover that, or our suppliers information on changes of dangerous substances, our burden will notify you immediately.

Best regards.

Gazzo, 02/02/2021
